

What does PANDEMERIC do?

SUPPORT EMRIC DURING THE PANDEMIC, BUT ALSO...

PROVIDE PROTECTION GEAR AND EUREGIONAL PCR TESTING

During the first Covid wave, PANDEMERIC has provided protection gear for first line operators and has provided PCR tests across borders.

EXTENDING COOPERATION BETWEEN HOSPITALS

PANDEMERIC aims to extend the already existing cooperation between the Intensive Care Unit (ICU) of the MUMC and the UK Aachen to all NL-Limburg hospitals. PANDEMERIC will also look into the possibilities of extending this cooperation to Belgian hospitals.

STUDIES AND LEGAL ADVICE

- Evaluative research on the response to the COVID-19 outbreak
- A study which focuses on the legal consequences of cross-border ambulance and IC transport
- A report analyzing ways to structure crisis and emergency cooperation across borders with regard to public procurement
- An Investigation into the possibilities for a permanent partnership between hospitals

EUREGIONAL SUPPLY CHAIN

PANDEMERIC aims to create a euregional supply chain in order to produce personal protective equipment (PPE) by connecting producers in the Euregio Meuse-Rhine. Furthermore, PANDEMERIC will make an inventory of reliable producers of PPE.

LINES OF COMMUNICATION

PANDEMERIC aims to strengthen the exchange of information by means of liaisons and to define the lines of communication between EMRIC, the project partners and with national/federal authorities.

WEB-BASED TOOLS

PANDEMERIC aims to develop a variety of web-based tools to foster cooperation in the field of crisis management. Furthermore, PANDEMERIC aims to interlink the fleet mapping systems across borders and make an administrative learning table in which the crisis systems in the three countries are laid down.
